COVID-19 Policy

At Specialist Academic Support, we want to ensure that all of our students and partners remain as safe as is possible during the ongoing Covid-19 outbreak and to do so, we are introducing some company-wide protocols and procedures. These will be updated frequently as the pandemic changes and lockdown measures are altered.

From this point, we will be conducting remote sessions on Zoom/Teams or another appropriate online method. Some face to face sessions will be possible in some circumstances. These sessions will be limited to one per day. At these sessions we kindly ask all students to observe the social distancing and face covering guidelines set out by the government. If we all do so, all of the time, we have the very best chance of not catching the infection ourselves and also not spreading the infection to our friends and family.

This virus is most contagious when the first symptoms show and for two or three days afterwards, so it's important that you follow this policy and [NHS guidelines](#) in order to protect yourselves and those around you..
